Abstract not available for EP 1320309 (A2)

Abstract of corresponding document: **WO 0211583 (A2)**

Oral devices are provided, including oral brushes that include bristle tufts and a rocking member having radially extending protrusions constructed to penetrate between a user's teeth. The protrusions are shaped to penetrate the interproximal region, cleaning between a user's teeth and stimulating the gums.
